Autoguiding Solutions | Orion Telescopes: Shop

Specifically designed as an autoguider, the monochrome Lodestar X2 has high sensitivity and low noise. It's also sensitive enough to image brighter deep sky objects. Because of its sensitive CCD sensor, the X2 is considerably more expensive than other autoguiding cameras. Orion StarShootAutoguider. Another dedicated autoguiding camera, the StarShoot has been around for many years and also works well as an entry-level astronomy camera.

Autoguiders - Camera Concepts & Telescope Solutions

The original amateur-level autoguider was the ST-4 from Santa Barbara Instruments Group (SBIG). This was a completely stand-alone autoguider involving a small, cooled, CCD camera and a large clunky control box. They are still available on the used marked and work very well, after you get over the steep learning curve and complex user
