Chapter 29 Reflection And Refraction

Reflection occurs when the waves do not go through the new medium and bounce back while refraction occurs when the waves go into new medium. Refraction waves change speed and reflection waves travel at the same speed.

Chapter 29: Reflection and Refraction Flashcards | Quizlet

Reflection and Refraction Chapter 29 study guide by rsidun includes 46 questions covering vocabulary, terms and more. Quizlet flashcards, activities and games help you improve your grades.

Chapter 29 vocab. STUDY. PLAY.
Reflection. The return of a wave back into its original medium is called reflection. Normal. Incident rays and reflected rays make equal angles with a line perpendicular to the surface, called the normal. Angle of Incidence.

Chapter 29-Reflection and Refraction Flashcards | Quizlet

Reflection is a wave bouncing off of a surface, while a refraction is a wave going through a medium. When a wave crosses a surface at an angle from one medium into another, why does it "pivot" as it moves across the boundary into the new medium? Each medium has its own capability to contain the wave, making the speed of the wave faster or slower.
