### Casting Numbers - Big Block B/RB - Dedicated to Mopar fans ...

The casting numbers for small-block Mopar and big-block Mopar are a seven-digit number, which is raised, and usually found in one of two locations. The first would be on the top of the intake runner, under the valve cover. The second location is on the underside of the intake runner on the cylinder head.

### A Guide To Mopar V8 Cylinder Head And Block Casting Numbers

The casting number is probably the most significant feature on an intake manifold. The casting date is usually found near the casting number. Intake manifolds are normally date coded in the form of a letter for the month (see table below), two numbers for the day and a single number for the year. For example, C259 indicates a date of March 25 ...

### Intake Manifold Casting By Year - MACSWEBS

The first is to locate and decode the large casting number on the left side of the block. The second and easier way is to locate and decode the hand-stampings on the block's ID boss. Please note that while a casting number on an engine intake manifold, cylinder head or other part can identify a Chrysler 383 component, such identification is not the same thing as identifying the engine as a 383.

### How Do I Identify a Chrysler 383? | It Still Runs

Tribute to Chrysler's Hemi V8 Engine. 1323333 : 1951-1952-1953 331 Hemi : 1323336 : 331 Hemi : 1327373 : 1952-1953-1954 276 Hemi

### Mopar's Infamous Hemi - Hemi Casting Database

To identify an intake manifold, say the 2-barrel versus the 4-barrel, the vertical attaching screws are easy enough to spot. If you want to tell a 1972 340 4-barrel intake from a 1974 360 4-barrel intake, I strongly recommend using the casting numbers, which are on the top of the intake and easy to see, even with the manifold installed.
