Instruction Manuals - C-TEC | Fire Alarms

Manual fire alarm activation is typically achieved through the use of a pull station (USA & Canada) or call point (Europe, Australia, and Asia), which then sounds the evacuation alarm for the relevant building or zone. Manual fire alarm activation requires human intervention, as distinct from automatic fire alarm activation such as that provided through the use of heat detectors and smoke ...

Manual fire alarm activation - Wikipedia

These are a component of a fire detection and fire alarm system used for the manual initiation of an alarm. Zoning (Detection Zone) A detection zone will usually consist of an area protected by several manual call points and/or detectors, and is separately indicated to assist in the location of the fire, in the evacuation of the building and firefighting.
