Olds Le 215 Engine

The 215 cubic-inch aluminum V8 was originally announced in 1960 as a lightweight economy engine for General Motors new line of compact cars; Buick Skylark, Olds Cutlass and Pontiac Tempest. The "215" first in the appeared in the 1961, with production ending in 1963 after $\frac{3}{4}$ million engines produced.

V-8 Cylinder Oldsmobile 215 - Speedway Motors Museum of ...

With an 8.75:1 compression ratio and a 2-barrel carburetor, the Olds 215 had the same rated hp, 155 hp (116 kW) at 4800 rpm, as the Buick 215, with 220 ft·lbf (300 N·m) of torque at 2400 rpm.

Oldsmobile V8 engine - Wikipedia

The Australian racing company, Repco, used the Buick 215's block as the foundation for the development of its 3-liter overhead-cam engine that powered the Repco Braham Formula 1 Grand Prix machines. Not bad for a sophisticated little engine designed by Buick.

Buick 215-cu.in. V-8 | Hemmings

Enter Buick's all-aluminum, 215-cubic-inch V-8. Spread between Buick and Olds over three years, and just two years in the Tempest, GM built nearly a million engines before the design was quietly laid to rest. Casting issues meant a high scrapage rate, which meant reduced profitability on a car that was already squeezing the General's pockets.

Olds Le 215 Engine - rousel.itdays.me

This engine weights only 320 pounds with all accessories, develops 155 hp from 215 cubic inches. This is the small aluminum V8 that was brought out in 1961 for the Buick Special, Olds F-85 and Pontiac Tempest compacts. Pontiac dropped the engine option after one year (It only sold a few thousand).

Buick Special 215 - 300 Lightweight engines

the engine was originally built many years ago to power a racing hydroplane boat (for which the 215 engine was a popular mill). The engine was apparently built, run on a test stand or a dyno only once for a short period of time, never installed into the hydroplane, and stored. Eventually the boat and

Oldsmobile "215" Stroker Motor (289 cid), by Kurt Schley

Displacements vary from 215 cu in (3.5 L) (for the division's unique all-aluminum early 1960s engine) to 455 cu in (7.5 L) for its last big block in 1976. All are naturally aspirated OHV pushrod

engines, except for an optional turbocharged version of the short-lived 215 used in the 1962-63 Oldsmobile Cutlass.
